REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 18 | THE REDCLIFF REVIEW | THURSDAY, MAY 7th, 1931

ALBERTA PROVINCIAL LIBRARY MAY -9 1931 EDMONTON

Great Success of Three One Act Plays

Cameo Was Well Filled For St. Ambrose Entertainment

It is a lon time since the people of Redcliff so thoroughly enjoyed plays put ou by local talent as they did the one last Friday evening, under the auspices of St Ambrose Chruch.

Tre program was made up of three one act plays. The first, "The Fenton Mystery," was staged by young married artists, and the other two, "Witches Three"' and "The End of Doltaire," were given by digh school pupils, assisted by Mr. King who took the leading roll in the latter

In the Felton Mystery the characters were all well chosen and each played his and her part so well that it would de folly to Attempt to deal with each one individually as muchtse same would have to be said about them all.

The play surly was a mystery from the commencement, and kept the audience guessing to the finish. It furnished good oppoortunities for thrills and all the characters made the best of their opportunities, keeping the the audience in suspense one mnute and in laughter the next

"Witches Three" and "The End of Doltaire" were taken from the literature of the high school pupils and were dramatised for them by Mr. King.

In both of these the pupils did exceptionally well, showing excellent talent for this class of work. The former was a most amusing skit which kept the audience in convulsions through out. The latter a tragedy in which Mr. King, as Doltaire, showed rare ability as a tragedian and was ably supported by the balance of the youthful mem bers of the cast.

entertainment was a huge suc-

From every standpoint the cess. The theeatre was crowded for the occasion and, despite the heavy expense, the committee in charge will clear very close to $100.

After the Entertainment the ladies of the congregation entertained the cast to lunch at the parish hall.

The performers,many of whom made their appearance on the stage for the first time did so well that it was the opinion of all, we should have more of such entertainments, and that great credit is due to Mr. King who instructed the cast and supervised the setting.

RUSSIA TO SEED 250,000,000 ACRES

Soviet Russia, apparently unconcerned with grain surpluses in the rest of the world this will sow 250,000,000acres, 70,000,000 to wheat and the rest to corn, rye, oats and flax.

The total area planted to all agricultural products is 350,000,000 acres, the area scrouled for 1933, the last year of the five-year plan. From present inlications the harvest will be excellent, but a serious shortage of farm machinery is causing deep concern.

A toatl of 104,806 immigrants came to Canada during the last calandar year.

Start Preparing For Tennis Club Here

Intending Players Are Asked to Hand in Names

The Tennis Club committee has been b sy this week making preliminary arrangements to get the grounds in shape for the season' operations. It is the intention to have the grounds levelled, and further wirk will depend largely on the interest enthusiasm and membership fees on t he part of those who want to join the club.

The Review has been asked to announce that the committee would appreciate it if all intending to join would do so as soon as possible so that everything could be put in shape and be ready to get away to a goodstart as soon as weathter permits.

Intending players should see Dr. Ward, O. Wooding or R. Simpson at once and secure their season tickets.

May Ask Government For Dom. Wheat Board

This is Decision of Prairie Premiers Unless Prices Ralie

A Conference of the three prairie provincial premiers with officials of farmers' organizations, was held in Saskatoon last Mondays and came to the following conclusion:

In order to give the necessary impetus and encouragement to the farming industry and all other branches of business, not only in the west, but throughout Canada, the meeting repectfully suggests to the federal government that unless within the present month theree is strong evidence of a considerable increase in price levels, the government should consider the establishment of a Dominion Wheat Board with provisions for the highest possible initial payment.

Here and There

The lobster season along the Nova Scotia coasts is now in full swing. It is estimated that at least 600 fishermen are engaged in the industry and that the number of traps will likely reach 300,000 or more.

The dining saloon of the new 42,500-ton Empress of Britain, known as "Salle Jacques Cartier," is the largest unpillared room on the five oceans. It was decorated by Frank Brangwyn, R.A.

As a tourist centre Cape Breton enjoyed one of the best seasons in its history during 1930. During the year 2,660 automobiles were handled across the Strait of Canso as compared with 2,497 for the previous year.

Vancouver will have the honor of welcoming a reigning monarch when King Prajadhipok, of Siam, and his consort, Queen Rambai-Barni, arrive there April 17, aboard Canadian Pacific liner Empress of Japan.

One of the largest and most courageous engineering undertakings on the continent is proceeding at the Abitibi canyon, Abitibi River, near Cochrane, Northern Ontario, where a plant is being built to generate 350,000 horse-power at a cost of over $30,000,000.

"British steel for Canadian produce," is the slogan lettered on massive shaftings unloaded at Saint John recently for shipment over Canadian Pacific Railway for use in hydro-electric development plants at Beauharnois, Quebec, and in the valley of the Ottawa River.

France should prove an excellent market for Canadian wheat since she has not committed herself to regulated purchases of wheat from Central European countries, said Hon. C. A. Henry, French Minister to Canada, interviewed at the Windsor Station, Montreal, on his way to present credentials at Ottawa.

Additional Local Items

Hon. W. L. Welsh was sworn in as Alberte's new lieutenant-governor, last Tuesday.

* * *

J. H. Devitt, who has been eat with a car of horses, returned to town lat Saturday.

* * *

Revs. Scragg and Cann from Medicine Hat and Pow from here motored to Duchess today on Presbytery business.

* * *

The dispatch with which the Stamp Commission has completed its investigation should serve as an object lesson to future commissions in this country.

* * *

The United States has accepted Canada's invitation to be officially represented at the international wheat conference in London on May 19th.

* * *

The junior Brick & Coal football team will play the tonw junior team a friendly game on Saturday. These junior games should be encouraged and supported by the citizens generally.

* * *

The Canadian Research Council indicates that they expect to shortly provide a market for old screenings by converting them into oil for soap, fertilizers and stock feeed.

* * *

The Ladies' Auxiliary to the local Legion are putting on a whist drive and dance in Cliff Hall on Monday, May 25th. Admission 75c a couple extra ladies 25c. Good prizes offered.

* * *

Membership tickets for the Brick and Coal Football Club are now issued. Each member who buys a ticket has a chance of getting a free trip to Calgary to see the Old Country football team play there on July the 1st. Tickets may be secured for 25c from any member of the B. & C executive.

W. Weeks, of Medicine Hat has joined the office staff of the Dominion Glass Plant here.

* * *

Reg Cann, of Brooks, is at present with his parents here. He is suffering from a severe attack of rheumatism but is slightly improved since coming here.

* * *

Last Monday evening the two town football teams played a friendly game which resulted in a 1—0 win for the Glassplanters Our sporting editor did not see the game as it was not advertised but from what we can gather from fans who did see it, the Bricks had much the best of the game throughout, but were unable to locate the nets.

Local Talent Asked To Repeat Program

Will Put it on in Westminster Church, Medicine Hat

Under the auspices of Gordon Memorial and Westminster churches the play put on here under the direction of principal King will be repeated in Westminster Church, Medicine Hat, on Friday May 15th. This will be an opportunity for those who have to see it,and for those who may not seen this excellent program to see it again.

GOVT. TO CONSERVE THE GAS WASTE

An order-in-council is being drafted by the provincial government whereby strict measures will be taken immediately to conserve the gas in Turner Valley and, probably, all Turner Valley companies will be ordered to cut down open ges flows to forty per cent.

Take a look at your Review label

Predicted Commission Will Endorse Futures

Not Detrimental to Interests of Wheat Growers

The finding of the Stamp Commisson, appointed to enquire into the effect leaing in grain futures has on prices to the producer, has been forwarded to the government,and according to prelictions from Ottawa, the report will declare that the old-established system of wheat buying for future delivery is not detrimental to the interests of the wheat grower and should not be abolished. Recommendation that some form of official supervision of future trading should be set up is also included.

If this forcast of the findings of the commission proes correct, it will not be a matter for surprise. The preponderance of evidence presented to Sir Josiah Stamp and his colleagues agreed that this class of trading was beneficial rather than harmful to the producer. Much of the evidence of an adverse character consisted merely of suspicion that all was not right on the Winnipeg Grain Exchenge, without and concrete proof.

There is little doubt that some system of supervision would be beneficial as well as remove suspicion..

LEGION MEETING

The regular monthly meeting of the local Legion will be held in their club rooms netx Sunday afternoon at 3 o'clock. As a report of the provincial convention will be presented and a number of visit officials from eMdicine aHt will be present a full atendance is desired.

Manitoba Wheat Pool members will be given the right to choose between pooling their grain voluntary or selling it on the open market.

The Football Season Opens on Friday

With Knockout Game in The McClellan Cup Series

The footbtil season in the Medicine Hat - Redcliff league will commeence on Friday with a knockout game between the Callies and the Brick and Coal for the McClellan Cup. The game will be played in Medicine Hat.

On Tuesday evening the Legion will play the Dominion Glass team here in the same competition.

The winners of these two games will play in Medicine Hat the following Friday.

This trophy was won by the Brick and Coal last year.

LARGE EXPORT OF HORSES POSSIBLE

One thousand horses a month may be shippad from Western Canala, principally Alberta, if the experimental shipment of 250head from the Montreal distrct has stisfactory results. Two representatives of a French firm have been investigating the situation in Alberta for the last fortnight.

They have found that there is a large source of supply but will withhold orders until they have reports on the Montreal shipment. It is expected that they will be used for food purposes. Tre experiment shipment and the possibility of further business have come about as a result of the action of the federal department of agriculture.

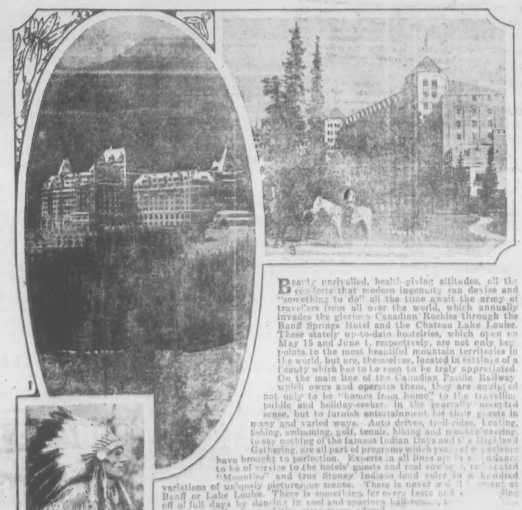
Rocky Mountains Are Ideal Holiday Land



Beauty unrivalled, health-giving altitudes, all the comforts that modern ingenuity can devise and "something to do" all the time await the army of travellers from all over the world, which annually invades the glorious Canadian Rockies through the Banff Springs Hotel and the Chateau Lake Louise. These stately up-to-date hostelries, which open on May 15 and June 1, respectively, are not only key-points to the most beautiful mountain territories in the world, but are, themselves, located in settings of a beauty which has to be seen to be truly appreciated. On the main line of the Canadian Pacific Railway which owns and operates them, they are accessible not only to the "homes from home" to the travelling public and holiday-seeker in the generally accepted sense, but to furnish entertainment for their guests in many and varied ways. Auto drives, trail-rides, boating, fishing, swimming, golf, tennis, hiking and mountaineering, to say nothing of the famous Indian Days and Highland Gathering, are all part of programs which year after year have brought to perfection. Experts in all lines are in attendance to be of service to the hotels' guests and real cowboys, attended "Mounties" and true Stoney Indians lend color to a hundred variations of uniquely picturesque scenes. There is never a moment at Banff or Lake Louise. "There is sometimes for every taste and ... Sing off of full days by dancing in cool and spacious ball-rooms ... tras, is not the least of the attractions offered.

The pictures show: (1) the Banff Springs Hotel; (2) ... ney Indian; (3) the Chateau Lake Louise.

Developments In Transportation

It is obvious to even the most casual observer of current happenings that we live in an age of rapid changes and revolutionary developments. Hardly a year passes that does not record some new invention, or the application of some hitherto known force to an entirely new purpose. The world makes progress, and progress cannot and must not be stopped, but in this onward march there is always a lurking danger that we may be weakening, possibly destroying, something which, in our own interests, we can ill afford to injure or destroy.

Does the general public, for example, fully realize the true meaning of the situation which has arisen in the realm of public transportation owing to the introduction and rapid increase in the use of motor busses for passengers and huge trucks for freight haulage upon our highways, and the effect which this development is having upon our railways? Without giving the matter much consideration many people may say: "We are not concerned as to the effect on the railways; they can look out for themselves." But this is a short-sighted view; because what affects the railways affects every producer, every taxpayer, every citizen in this country.

Let us briefly examine this new development, not from the standpoint of the railways, or of the passenger busses and freight trucks, but from the standpoint of the farmer-producer, the merchant, the ranks of labor, and the individual taxpayer.

The people of Canada have invested hundreds of millions of dollars in railways. They are paying heavy taxes today because of land grants, tax exemptions, cash subsidies, bonuses, guarantees of bonds and the payment of deficits in years past, in order to provide these essential services. Today the people of Canada are the owners outright of more than one-half the railway mileage in Canada, while thousands of Candians, as individuals, are financially interested in the second great railway system of this Dominion. It is in the interests of every citizen, therefore, that our railways be operated efficiently, financially as in all other respects.

During recent years the taxpayers of Canada, Federally, Provincially, and Municipally, have been investing tens of millions of dollars annually in the provision of good roads. Thousands of miles of all-weather highways have been built, and the constant demand is for still more and better highways. The tax burden is mounting higher and higher as a result. The advent of the automobile forced this newer development. It could not be prevented; it is not to be regretted; it is progress.

But these improved highways have created a new situation, namely, the development of motor transportation services over these highways for both passengers and freight haulage. The outcome is that the competition which the privately owned and operated automobile offered to the railway passenger service, has been intensified, with the result that railway freight earnings,—the most profitable department in railway operation,—are suffering.

Briefly stated, that's the situation. Having taxed ourselves to create the railways, we have now taxed ourselves to create the means whereby rival services are made possible to cripple the institutions in which we are so heavily interested, financially and otherwise.

What does this mean, say to the farmer-producer of Western Canada? Everywhere the demand is being voiced that railway freight rates should be reduced; that in view of the present low price of all farm products, existing freight charges on these products to the markets of the world are too high, and altogether out of proportion to the price of the commodities transported. Granting this to be true, the fact remains that it costs the railways just as much to move a bushel of 50 cent wheat as it does to move a bushel of $1.50 or $2.00 wheat.

So far as the farmer-producer is concerned he must rely upon the railways to transport his product. He may move it from his farm to the nearby elevator in a truck, but he cannot so transport it to the head of the lakes ports or to the seaboard. The railways must do that. Neither can he depend upon motor truck services to bring to him all the heavy machinery and equipment from far distant points; the railways must do that, too.

Therefore, the question for the farmer-producer, and for the merchant who depends upon the success of farming for his livelihood, to face and answer is: How can freight rates be reduced; how in fact can they be maintained even at present figures, if the railways lose the revenues accruing to them from short hauls, and the lighter classes of freight?

Some people may answer that the railways can prosper on their long hauls. But experience has demonstrated that no railway can exist on long main line hauls; it is the short feeder lines to the main line that makes any system a success. The Grand Trunk Pacific main line was as fine a piece of railway as any country possessed, but the war stopped the building of the branch line feeders, and the railway went into liquidation.

Even assuming that main line long haul traffic could make a railway a paying proposition, the fact remains that without the revenues accruing from short hauls on the lighter classes of freight, railways would have to charge more, not less than at present, for transporting the farm products of this country to the open markets of the world.

This article, and a second one to follow, is not written as an apologist for, nor as propaganda in behalf of the railways, but solely in order to direct attention to some factors now entering into the transportation problems of this present age.—Editor.

A Best Seller

John Bunyan is a best seller in Tibet. A special translation of "The Pilgrim's Progress" was prepared for Himalayan readers by the Religious Tract Society—and now only two folio who caught—hic—that fish is a copies remain on the society's shelves.

Few people care to be reminded of the little sins they like to commit.

Couldn't Be True

The drunk halted in front of an enormous stuffed tarpon in a glass case. He stared at it for a minute or two in silence. Then he said: "The —hic—liar!"

Japan will spend over $7,000,000 for new public works this year.

Palpitation Of The Heart
Nerves Were All Gone

Miss Rose Griffin, Ashern, Man., writes: — "About five years ago I was troubled with palpitation of the heart, caused by a shock, and my nerves were all gone, and I could not sleep. I read about Milburn's Heart and Nerve Pills and decided to try them. After I had taken three boxes I was feeling fine again. I think they are a wonderful remedy, and wish all others who suffered as I did would give them a trial."

Returned Rhodes Scholars

Many Are Teaching In Canada's Universities and Colleges

An examination of the records shows that returned Rhodes Scholars are already playing a great part in Candian life, even though the oldest of them are not more than forty-seven years of age. They shine particularly in law and university teaching. We need go no farther afield than our own McGill University to point out a Rhodes Scholar, and a fellow of All Souls, Oxford, who is Dean of the Faculty of Law. It is especially encouraging that out of 140 Rhodes Scholars, no less than 47 are now teaching in our universities and colleges. Many of these are to be found in the newer institutions, for example, in the West. Thus, as by a laying on of hands, our Canadian student bodies are receiving the impress of Oxford at second hand, if not at first.—Montreal Star.

NEIGHBORS TALK

"I am employed in a theatre and it is a problem to make ends meet, as I help support my mother and sisters. I like to dress well but haven't very much to spend on clothes. To give the appearance of variety to my slender wardrobe I change the color of a dress or stockings as soon as by a things become faded. I always use Diamond Dyes for the work—using them as dyes for dresses and as tints for stockings. I have always gotten such perfect results that our neighbors talk about the great number of new things I have.

"I learned about Diamond Dyes from our wardrobe mistress. She says she has tried all the dyes on the market but none do such splendid work and are so easy to use as Diamond Dyes. I understand they are the world's most popular dyes—and they deserve to be."

L.P., Montreal.

Oratorical Contest

Quebec Only Province To Uphold Dominion At Washington In October

The province of Quebec will uphold the laurels of the Dominion at this year's international oratorical contest in Washington. As the time limit for registering candidates has expired, and none of the other provinces has entered representatives, it is now left to the province of Quebec to send a youth to the American capital to champion Canada's fame in eloquence against the pick of the other countries.

The Washington international eloquence contest will be held in October, 1931.

A MILLION FAT FOLKS CAN'T BE WRONG

And that's a low estimate of the number taking Kruschen to keep down superfluous fat.

When you take vitalizing Kruschen Salts for a few days that old indolent arth - chair feeling deserts you—it doesn't matter how fat you are—the urge for activity has got you—and you're "stepping lively."

And best of all you like this activity—you walk a couple of miles and enjoy it—you thought you'd never dance again, but you find you're getting as spry as ever—the old tingling, active feeling reaches even your feet.

Kruschen is a combination of the six salts Nature has already put into your body to keep you slim—if it were not for these vital salts you could not live.

One bottle is enough to prove to you that Kruschen will make you feel younger — spryer — more energetic — you'll enjoy life—every minute of it.

A half teaspoonful in a glass of hot water every morning is all you need to keep healthy—keep your stomach, liver, bowels and kidneys in splendid condition—free your system from harmful toxins and acids.

Displaces Thousand Men

A giant ditch digger is operating in Los Angeles, which does the work of 1,000 men. The digger is capable of removing four cubic yards of earth every 55 seconds, and it keeps 40 trucks constantly on the move removing the dirt it piles up.

Fresh Supplies In Demand.

Wherever Dr. Thomas' Eclectric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

Daily Hours Of Sunshine

The Topographical Survey, Department of the Interior, Ottawa, publishes a nomogram-diagram by which the hours of sunshine for any day at any place may be readily obtained.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

Artificial graphite, an electric furnace product, is made near Niagara Falls, Ontario.

New Queen Of The Seas

Construction Work On Giant Cunard Liner Is Proceeding Rapidly

Work on the new 73,000-ton Cunard liner has progressed so rapidly that word was received at the local offices of the Cunard Line to the effect that it is highly probable that the date of the launching will be advanced from June, of 1932, to February, of next year.

The yards of John Brown and Company, who are building this giant liner, have been the scene of feverish activity ever since the order for the vessel was first given and the clang of the riveting machines has been incessant for twenty-four hours every day for weeks.

Factories and foundries all over Great Britain are also to be found working on a twenty-four hour schedule in an effort to speed up the work as much as possible. No little effort has been made to ensure that all the component parts that will go to make up this vessel and all her equipment, will be of the very best and hundreds of the finest craftsmen that the British Isles can produce are at present "doing their bit" in producing this new "Queen of the Seas."

It was only last Sunday that the rudder for the new ship left the factory in Darlington on board a steamer that required special fitting out for the job of transporting it to the yards of John Brown at Clydebank. This gigantic piece of metal weighs over one hundred and fifty tons and is the largest that has ever been constructed. Skilled mechanics have been working for weeks in the building of this rudder.

In comparing the size of this vessel to any other liner that has ever been built, an astounding comparison has been disclosed. If it were possible to take the hulls of the first four vessels of the original Cunard fleet and place them in the inside of any of the funnels which will grace the new Cunarder, there would still be room to spare.

While work has been proceeding apace at Clydebank, there has also been considerable activity at Southampton, where the new graving dock is in the course of construction. Each year the Cunard Line gives every one of their fleet a complete overhauling and placed back in the service. This will also be done with this new super liner, and as there was no graving dock in the British Isles big enough to hold her, steps were taken to build a dock that would.

Interesting Coin Collection

Also Indian Peace and Treaty Medals Exhibited In Montreal

Thousands of coins and medals were recently gathered and arranged in show-cases at the Chateau de Ramezay. One gallery had tables and even walls almost covered with them. They represented the systems of reckoning employed in the last three millenniums in the form of busts of kings, dictators, emperors, Caesars and Pharaohs. The exhibition included what is considered probably the best collection of Indian Peace and Treaty medals to be seen on the continent. Most of them were struck off specially to serve as gifts. One of the pieces was the famous medal of George IV. which was given to Andre Romain, chief of the Huron Tribe.

Stimulate Interest In Mining

H. G. Nichols, resident mining engineer at Kamloops, is to give a series of lectures and demonstrations to prospectors and mining men on the minerals and mineral formations of this section of British Columbia with the idea of stimulating interest in mineral development.

Reduced By Asthma. The constant strain of asthma brings the patient to a dreadful state of hopeless exhaustion. Early use should by all means be made of the famous Dr. J. D. Kellogg's Asthma Remedy, which more than any other acts quickly and surely on the air passages and brings blessed help and comfort. No home where asthma is present in the least degree should be without this great remedy.

Back To Nature

"Well, how are you getting on, now that you are married?"

"It's just like the Garden of Eden."

"I am glad to hear that."

Notabilities Invited To B.C. Celebration

Province Observing Diamond Jubilee Of Entry Into Confederation

An invitation has been extended by the committee in charge, through the provincial government and proper official channels, to H.R.H. Princess Mary and the Earl of Harewood to attend the celebration of the diamond jubilee of B.C.'s entry into Confederation. Announcement to this effect was made by Reg. Hayward, P.M., chairman, and Robert Hiscocks, secretary of this committee.

Invitations are also being extended through Rt. Hon. R. B. Bennett, prime minister of Canada, for the delegates from the different British dominions who will be arriving in Canada about that time to attend the Imperial Conference, to visit Victoria and join in the festivities on July 20.

The United States government is being asked through Hon. G. A. Bucklin, consul for the republic, to have several of the capital ships of the United States navy come to Victoria for the event. Similar invitation is being extended to the British admiralty.

Manitoba Creameries

Manitoba creameries received during February 811,628.6 pounds of butter-fat against 520,087.3 in February, 1930. An increase of 56 per cent. Of the cream received 68 per cent. graded "table" 10.3 per cent. special; 18.6 per cent. No. 1 and 3.1 per cent. No. 2.

Recently appointed a vice-president of Standard Brands Limited, in charge of Gillett Products Division.

Had Successful Year

Standard Brands Limited Reports Record Business—W. C. Leckie Appointed Vice-President

At the annual meeting of Standard Brands Limited, held in Montreal on March 31st, Mr. Corwin Wickersham, president, announced that the year just closed has been a remarkably successful one, particularly in view of general conditions throughout Canada.

Sales of the majority of Standard Brands' products have shown steady gains in the past twelve months, and an indication of the future is seen in the fact that, for the first three months of 1931, sales of all major products have eclipsed the record peaks reached in the corresponding period a year ago.

Mr. Wickersham also announced the appointment of Mr. W. C. Leckie, Toronto, as vice-president in charge of Gillett Products Division of Standard Brands Limited. The new list-of officers is now as follows: Corwin Wickersham, president; J. W. Horsey, vice-president, in charge of Fleischmann Products Division; John Anderson, vice-president, in charge of Chase & Sanborn Products Division; W. C. Leckie, vice-president, in charge of Gillett Products Division.

Mr. Leckie has been actively connected with the marketing of Gillett Products: Magic Baking Powder, Gillett's Lye, Royal Yeast Cakes, etc. for many years, having served, previous to the merging of E. W. Gillett Company, Limited, into Standard Brands Limited, as vice-president and general manager of the former organization.

Recipes For This Week

(By Betty Barclay)

COFFEE TARTS

1 cup coffee.
1 cup sugar.
2 eggs.
½ cup butter.
½ cup walnuts.
½ cup raisins.

Cream the butter and sugar, add the eggs well beaten, the coffee, chopped walnuts and raisins. Line patty tins with pastry, fill with the mixture and bake in a moderate oven (325 degrees Fahrenheit) for 45 minutes. Serve with whipped cream on top, using ½ cup of strained coffee mixed in the cream.

CABBAGE-COCONUT DELIGHT

2 cups cabbage, finely shredded.
1 cup grated pineapple, drained.
1 cup shredded coconut.
¾ cup mayonnaise.
Dash of salt.

Crisp cabbage by allowing it to stand in ice water. Drain and dry thoroughly. Toss lightly together with remaining ingredients. Serve on crisp lettuce. Garnish with strips of pimento. Serves 6.

Unlimited Supply Of Salmon

British Columbia Industry Will Be Maintained For All Time

The salmon supply in British Columbia will be maintained for all time and the salmon canning industry should increase in value in the future, Major J. A. Motherwell, Dominion Superintendent of Fisheries for British Columbia, states in his annual report. The record 1930 pack was 2,221,783 cases, which exceeded the previous record of 1926 by 156,585 cases.

The Wrong Outlook

"Don't you love me any more?" demanded the recent bride, apparently on the verge of tears.

"Certainly darling," cried the young husband.

"Then," demanded the bride, "why are you looking out of the window?"

An adult lion in captivity eats about 16 pounds of meat a day.

PILE PAIN

Ends Right Away

"The very first time I used 'Soothe-Salve' it ended the itch and pain of my piles right away, stopped swelling and bleeding. Piles are gone."—L. T. Geers. Quickest relief known. All druggists.

Colonization Plan

Thirty Thousand Acres In Manitoba Purchased By American Syndicate

The sale of 30,000 acres in Lake View, north of Portage la Prairie, Man., to a Minneapolis, Minn., syndicate for the purpose of colonization by American farmers, was announced at Winnipeg by Walter J. Whidden, of W. J. Whidden and Company, real estate firm.

Mr. Whidden refused to announce the purchase price of the area, which will be colonized this summer by farmers from Minnesota, North Dakota and Wisconsin, who will develop modern farming on a large scale. The soil is suitable for mixed farming, he said.

FITTED BODICE GIVES DEMURE QUAINTNESS TO PINAFORE FROCK

This cute pinafore frock is a favourite with the tiny little French tots of pre-kindergarten age.

It is accompanied by bloomers that show good taste by peeping 'neath the dress.

The fitted bodice is the cutest ever. The bow-tied sash emphasizes the fact. The attached skirt displays soft gathering that gives a comfortable hem fullness.

An old-fashioned calico print made the original. The collar and cuffs were of linen finished with a hemstitch.

Style No. 212 is designed for the 2, 4 and 6 year old.

It's all so simple to fashion it.

And when it's so practical, why not have young daughter wear French clothes?

Sprigged dimity, dotted batiste, floral patterned wool challie, gingham checks, striped percale, wool jersey and linen in sports or handkerchief weight are fetching materials for this little outfit.

Price of Pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

TO IMPROVE YOUR APPETITE

Feeling indifferent to food? Out of sorts? Depressed? Stimulate your digestive tract with Dr. Carter's Little Liver Pills. All vegetable. Gentle but thorough. They'll get rid of body poisons that cause Indigestion, Gas, etc., and give you a new interest in food.

25c & 75c red packages

Ask your druggist for CARTER'S LITTLE LIVER PILLS

BLACKHEADS

Don't suffer any longer from these unsightly blemishes. Overcome them at home! Get 2 oz. Peroxine Powder from your druggist. Sprinkle a little on the face cloth, apply with a circular motion and the blackheads will be all WASHED AWAY. Satisfaction or money returned.

To Remedy Agrarian Ills

Writer Says the Cure Depends On Co-Operation Of Five Nations

Five nations—Canada, the United States, Russia, Argentina and Australia—hold the power to remedy agrarian economic ills, Louis Fischer says in his new book, "Why Recognize Russia?"

He asserts that Russian wheat exports are a permanent factor in the world market, and North American boycotts cannot affect the situation.

"Yet the American farmer is suffering from world grain over-production. The United States cannot sell its surplus cereals, the agrarian depression is aggravated, the general economic depression becomes confirmed.

"The whole world has to get together on this matter.

The cure depends on the five nations. Instead of calling one another names, they could consult with one another and endeavor to find a way out through mutual agreement. The Bolsheviks would be only too happy to participate in a conference which would again raise the price of wheat, give them more money for their exports, and thus enable them to buy more machines in the western countries. That is what business men would do."

Fischer says that Russia's representatives to such a conference could be only officials and that since farmers have no organization of world scope, an officials' conference is necessary. The parley would "perhaps pave the way to larger political pourparlers," he said.

He adds that fears that the Bolsheviks might "dump" on the market would be allayed and a better understanding of Russia brought about.

Benzine Experiments

Plan To Investigate Possibilities Of Extracting Benzine From Turner Valley Gas

Experiments dealing with the manufacture of benzine from Turner Valley waste gas will be conducted during the coming season at Calgary by Dr. E. H. Boomer, of the University of Alberta, in a specially constructed semi-commercial plant to be erected by the Government of Alberta. Preliminary arrangements for this work by Dr. Boomer were made in January at a meeting between members of the Alberta Research Council and Dr. H. M. Tory, president of the Dominion Research Council.

The Lamb Market

"Two million lamb carcasses are required to fill the total wants of the Canadian consumer today, while at best our Canadian production is around 1,500,000 carcasses a year. These figures are irrespective of local country consumption, on which no statistics are obtainable."—Canadian Co-Operative Wool Growers, Limited.

Bats can remain head-downward throughout an entire winter's sleep.

A full-grown apple tree has approximately 50,000 leaves.

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

There we were! Standing on the edge of this little mountain lake. Fire to the right of us, fire to the left and behind us. Then we heard that strange crashing through the underbrush.

Scottie stood howling and growling—then to our relief, a deer and a fawn burst through the bush and rushed along the edge of the lake. They passed so close I could have touched them as they dashed along.

Then the woods seemed to be alive with scurrying animals all rushing down to the shore. Bears, cougars, porcupines, rabbits, together in their struggles and racial fears forgotten, and a score of little furry things one never sees by day came out of their hiding places and made for the water also.

It was quite useless to try and go around the fire in either direction—we must have a raft. There was plenty of time now for it would take the fire flames to reach us from any direction. I casually set about getting some logs for a raft.

Then a sudden Scottie cocked his ear. I listened, and sure enough I heard the drone of a motor. Picking and looking I could see the "plane, and in a few minutes it was spiraling down to make a landing in the lake. You see, it was an amphibian plane that lands either on the ground or on the water.

It hit the water with a "splash—splash" and taxied slowly up to us. There was a good old Bob from the aerodrome—and maybe he didn't look good to me. But what a rattletrap of a machine he had! "Bob, where did you get that old crate?" sounded like a Vickers' —but if that's a Vickers, then I'm a nugget.

"Well," said Bob, "you don't look much like one, and speaking of old crates, where did you get that swell suit of clothes?"

Sure enough I was black from head to foot from soot and cinders. My clothes had been cut up to make a rope my shirt to make a sling to lower Scottie over the falls, and the legs of my pants had been torn into strips to bind the raft together.

"But seriously, Bob, wherever did you get that floating wreck?"

"The motor is a hummer—it's a real Vickers," answered Bob, "but whoever hung that scarecrow of a plane on that good motor I cannot imagine. It would make a good wagon for the wheels are sound, or a good boat for it doesn't leak, but it acts like a flying rooster in the air, looks like one, but no fill."

"I don't like it any better than you do," confirmed Bob, "but when I heard that you and Scottie were lost there wasn't much time to go around looking for a good machine. It was a question of getting hold of some kind of plane and getting started. In fact, I didn't even stop to enquire who owned this craft, just as long as the propeller went around, that was all I asked of it."

"Anyway, here's your life preserver," said Bob, "and you'd better strap it on, if this bunch of inlett parts doesn't hang together—you may have to walk home."

By the time the parachute was strapped on, we were ready to go. Bob gave her gas carefully, we moved out into the lake turned and headed into the wind.

"Now," did you have to jump, I must find some way of getting Scottie to you so I could possibly fall out of my arms. I found a piece of strong canvas in the bottom of the cockpit and in the middle of this I cut four holes, just big enough to shove Scottie's legs through.

This done, I fastened securely to one of the parachute straps. Scottie was now well tied to the parachute, and if I had to jump his chances were about 50-50 with me, and with all these extra strains, I'd say the chances against were 3 to 1.

After we were all settled down, and everything arranged so secure drifting along up there for above the ground that I forgot all about the possibility of having to jump.

Suddenly I received a sharp reminder. We ran into an air pocket and dropped like a lead shot. Only for an instant—then we were out of it, but that instant was a death blow to the old "plane. It just seemed as if every nut and bolt were ready to fall apart. Bob turned and motioned me with his hand. Up to the edge of the cockpit I scrambled—then jumped.

Quite comfortably we floated down. Off in the west a wisp of smoke was having rapidly down through the hills. It proved to be a fairly large fire, and from the engine sighted and approached him train of the logging camp. What luck!

While one can guide a parachute somewhat by pulling on the ropes, it is not easy to steer exactly.

Down, down, we came. Right into some scrub spruce we landed on the hillside above the track. Up came the train crew and we ran into the caboose to ride out into civilization.

Well, we have been enough adventuring for every one concerned, but I guess now it was time for a rest long before we found ourselves off again, and on a more dangerous journey in an older and stranger land.

(To Be Continued.)

Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown ups. - - - Pound and half pound tins at your grocers

It is supposed that the term "cantaloupe" is derived from Cantalupo Castle in Marca d'Ancona, Italy, where such melons were first grown in Europe. The seed was obtained in Armenia.

Jean Jules Verne, grandson of the author of "Twenty Thousand Leagues Under the Sea," christened the new French submarine supply ship, Jules Verne, named in honor of his grandfather.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extremes changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livest ock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Rating Of Leading Banks

Figures Show Canada Occupies High Place In List

The rating of the leading 150 banks of the world reveals a tremendous concentration of wealth scarcely dreamed of a decade or two ago. And it also shows that Canadian banks occupy a very high place in the list.

The first bank in the list is the Chase National Bank of New York, with deposits amounting to $3,075,-770,823. This is the first time that a United States bank has been first in the list of leading banks in the English-speaking world. Amalgamation of this bank with several other strong financial institutions has placed it at the head of the list. Then follow three London banks, the Midlands, Lloyds, and Barclay's, with deposits only slightly less, particularly in the case of the Midland Bank. Then follows the National City Bank of New York, after which come two more London banks, the National Provincial bank and Westminster. The Bank of England is twelfth on the list with deposits of $892,588,032, the Royal Bank of Canada, thirteenth, with $737,191,166, and the Bank of Montreal fourteenth, with $652,345,545. The Canadian Bank of Commerce is nineteenth with $558,870,990 of deposits. The Bank of Nova Scotia comes fifty-second with $205,862,254. The Dominion Bank is ninety-sixth, and the Bank of Toronto one hundred and sixth.

The Canadian banks have generally extended world wide ramifications, particularly the larger ones. Expansion of some has been the result of the merger policy and it is doubtful if that process is completed.

There is an old saying "as safe as the Bank of England," in which connection Canada has two banks which follow pretty closely that historic institution.

The anomaly of these great concentrations of wealth is, however, that they are possible in a world depression, but they really represent the holdings of many million of people.

Production Is Costly

Printing a Newspaper Not As Cheap As People Imagine

In view of the recent amalgamation of the New York World with the Telegram of that city, much information has been given to the public as to the financial losses which this once great newspaper sustained during the past five years. Such losses are perhaps hard for anyone to understand who is unfamiliar with the newspaper business, but some indication of the tremendous cost of publishing a paper in New York are indicated in a recent statement by the New York Times that last year it used 107,336 tons of newsprint, or about 2,700 carloads. The ink used to print the Times amounted to 2,300 tons, and the total number of pages printed was 14,951,885,440. The newspaper has a staff of 3,462 and the average weekly payroll is $177,918.26.

Imperial Fruit Show

It is pointed out in the market news letter of the Department of Agriculture for British Columbia that the setting back one week of the forthcoming Imperial Fruit Show in Manchester, England (now scheduled for November 7th), is of benefit to British Columbia apple growers, as in picking winter apples, a week extra on the trees should improve their color.

Will Buy Western Grain

Western Canada grains will replace those imported from the United States for use in Ontario if legislation is passed next year, following investigation now being made by the Department of Agriculture, under Col. Thomas Kennedy. The expected legislation will probably bind grain pools, elevators and feeders of the province in a co-operative arrangement.

Rescued Man: "You have saved my life and I could gladly give you a shilling but I have only a two shilling piece."

Rescuer: "Never mind. Jump in again."

"Are you using an apple as bait? You ought to put on a caterpillar, man."

"The caterpillar's inside the apple."—Buen Humor, Madrid.

When the Pay Cheque Stops

First Obligations Allowed To Lapse Are Rent and Insurance

What happens when the pay cheque is cut off? It is safe to say that in no two families does the same thing occur in exactly the same way; but a study recently made in the "Family," a magazine published by the Family Welfare Association of America, gives a fairly good idea of the situation. With fifty families as the basis of inquiry, the publication describes what happens to people when there are no more pay envelopes.

The first obligations allowed to lapse are rent and insurance. Thirty-two out of fifty families owed one to sixteen months' rent.

To secure food and work are the primary concerns among the unemployed. Four months after the Family Society in Philadelphia had to discontinue relief because of lack of funds, many families were living on bread, potatoes, coffee and weak soup, children and adults alike. In one destitute home the mother told a social worker: "I used to just sit and wonder if the people next door would send in something after they had finished." If no such manna was forthcoming, "I'd tell the kids to drink lots of water, and we'd wait for the next meal." The commonest debt is to the neighborhood grocer.

When organized relief agencies cannot help, the families with no job-holders depend on the precarious aid of relatives and neighbors, churches or former employers.

"Every family," the report says, "clings to some articles which symbolize respectability and prosperity to them." It may be, too, that such relics as an "ornate gilded vase" are kept because they are not so easily convertible into cash as the necessities.

An Article On Editors

Kansas City Schoolboy Seemed To Understand His Subject

It is alleged that a schoolboy in Kansas wrote the following, entitled "An Editor":

"I don't know how newspapers and magazines got into the world, and I don't think God does, for He ain't got nothing to say about these in the Bible.

"If the editor makes a mistake, folks say he ought to be hung; but if the doctor makes mistakes, he buries them and people don't say nothing because they can't read Latin.

"When the editor makes mistakes, there is a big lawsuit and swearing, and a big fuss; but if the doctor makes one, there is a funeral with flowers and perfect silence.

"A doctor can use a word a yard long without him or any one else knowing what it means; but if the editor uses one, he has to spell it. If the doctor goes to see another man's wife, he charges for the visit; but if the editor goes, he gits a charge of buckshot.

"Any college can make doctors to order, but editors have to be born."

Whoever did write it knows something about editors—and doctors.

Grass and Clover Seed

Dominion Department Of Agriculture Will Encourage Growing Of Pure Strains

The seed branch of the Dominion Department of Agriculture, through the various provincial offices, is this year putting out large quantities of pure strains of grass and clover seed. The method followed is to place the seed with selected groups of farmers in the various provinces, with the idea of producing and making available at reasonable prices larger quantities of pure grass and clover seed, and the officers of the various provincial branches will exercise an oversight of the farms where this seed is being produced.

A Paying Industry

In 1929 the number of hosiery, knit goods and fabric glove industries reporting to the Dominion Bureau of Statistics was 156, with a total capital investment of $64,874,497, a gross production of $59,500,060 and a total employment of 19,948. Sixty-three establishments had a capital investment of $50,244,168 or 91.3 per cent. of the whole and an average investment per establishment of $940,384.

Better Cereal Seed

In order to further interest farmers in growing better cereal seed, the field crop division of the British Columbia Department of Agriculture has secured a list of reliable varieties which are being sent upon application. This will be the last season to secure seed for sowing to compete in the World's Grain Exhibition to be held in Regina in 1932.

Master—"What is the feminine of bachelor, Thomas?"

Thomas—"Please, sir—er—a lady-in-waiting."

Coast To Coast By Air

Trip Made In Thirty-One Hours Over U.S. Route

The new United States transcontinental all-air schedule went into effect on April 1 over the lines of National Air Transport and Boeing Air Transport, and now westbound passengers will be able to eat breakfast in New York, lunch over Ohio, dinner at Salt Lake City and his next day's luncheon in San Francisco. Huge trimotored 'planes with eighty-foot wing span and two-way radio telephones will whisk him at a cruising speed of 115 miles an hour. Thirty-one hours will suffice for the westward journey from coast to coast; twenty-eight hours—because of favoring winds—for the eastward flight. Train time between New York and San Francisco varies between seventy-eight and ninety-six hours.

Comfort and safeguards will surround the through passenger. He will have no berth to sleep in, it is true, but his chair can be tilted and he can have pillows and blankets should he care to drowse, or a reading lamp if he is wakeful. Two pilots, with average time of 4,500 hours in the air, will have in charge the 'plane, of more than seven tons gross weight. The whole airway of 2,770 miles is lighted, although night flying will cover only about 1,200 miles of the total. Night and day the radio directive beacons of the Department of Commerce will give true readings of the course.

A game of cards or a motion picture in the 'plane may be the resort in dull moments for the traveller. What could more vividly stamp the transition of air flight from adventure into transportation than the admission that there may be dull moments in crossing the breadth of the land from Atlantic to Pacific in a day and a quarter.—New York Times.

School Examinations

A Crude and Capricious Method Of Ascertaining Merit

The best solution of the difficulty is that we should frankly regard examinations as a crude and capricious way of ascertaining merit and should attach to them just as much importance as they deserve, and no more. Success in them does mean something. It means that at any rate the candidate has acquired a little knowledge and has the faculty-tedious or otherwise—of getting information into his mind at a given moment to make it go a long way. But we must remember that there are other qualities that matter and that life has a way of finding them out as the examiner never can. It is, no doubt, a bad thing to fail in examinations; it is a worse thing to allow oneself to be permanently set back by the failure. —Evening Standard, London.

Edmonton Creamery Receipts

Cream receipts in the Edmonton section of Alberta for February have doubled over February a year ago according to a report of Dr. C. P. Marker, dairy commissioner. The industry has been gaining steadily in the province, showing an average increase of 61 per cent. in December, 75 in January, and 83.8 per cent. in February over last year.

The total gasoline consumption last year was more than 13,000,000,000 gallons, and computing an average of 15 miles to the gallon, more than 1,-000 motorists could have made a trip to the sun and back.

The Family Doctor

Gives Good Service and Ability Should Not Be Doubted

There will be many people who will sympathise with the view expressed before the American College of Physicians by Dr. G. E. Follansbee, of Cleveland, regarding the family doctor. There are, he declared, too many specialists and not enough general practitioners among physicians. The public has come to believe that the family doctor is not competent to handle many ailments, whereas many cases taken by specialists could be treated equally well by a general practitioner, he argued, urging that confidence in the family doctor must be restored.

The gradual eclipse of the family doctor is due to a multitude of causes, but certainly not to any lack of competence on his part. The specialist is a necessity in this hurried age, and it would be both futile and illogical to suggest that he has not a very important place in the medical profession. But for a great many people the specialist is not available, because his charges are invariably much higher. These people have only the general practitioner upon which to rely. Twenty years ago, he was good enough for anybody. Today, it is unfortunately true that public faith in his ability is weakening.

Yet the general practitioner continues to serve the public. In the country districts he is the only doctor available, and he does his work as a rule with competence and with good results. Many a specialist has had occasion to congratulate the family doctor upon his diagnosis and treatment of serious cases. It is being done every day at our hospitals. If the specialist has faith in the family doctor, why should the public doubt his ability? He has a noble record of faithful service, self-denying devotion to duty and many victories over diseases to his credit. He has not failed the public in the past, and there is no reason on earth to think that he will fail them now. —Montreal Star.

What Is Wrong

Speaker Says Most People Are Not Really Grown Up

What is wrong with most people is that they are not really grown up. Fairy tale day dreaming of being great powerful people, of having lots of money and endless breakfasts in bed isn't so much an indication of a wonderful faculty of imagination as just plain childishness and is, moreover, rather dangerous, as the onset of hard reality is likely to bring the world crashing down around one's ears. These were some of the points driven home by Dr. Charles G. Obermeyer, a young Africander, in a recent address before the Montreal Women's Club.

Knew His Chickens

A red-haired boy applied for a job in a butcher shop. "How much will you give me?"

"Three dollars a week; but what can you do to make yourself useful around a butcher shop?"

"Anything."

"Well, be specific. Can you dress a chicken?"

"Not on $3 a week," said the boy.

Notable For That

The manager was exasperated. "You're the slowest youngster we've ever had in this office. Aren't you quick at anything?" he asked.

"Oh, yes, sir," replied the boy "nobody can get tired as quickly as I can."

'QUAKE DESTROYS NICARAGUA CITY

Earth tremors shook Managua, Nicaragua, in the early morning hours recently, and the death toll was very heavy. Hundreds were killed and thousands injured. Here is seen the complete destruction of a once flourishing business section, where fire followed the quake. This photograph by American Telephone and Telegraph Co., was sent by telegraph transmission and fast mail.—Photo by Wide World.

Advertise Beauty Spots

Tourists Not Interested In Factories and Municipal Buildings

Early as the season still is, the matter of summer automobile touring is already beginning to occupy people's minds. Those who are going to go touring are beginning to daydream about the places that they will visit, and to wonder if they will be able; by good luck, to afford new cars to do the visiting; and towns that are on the tourist routes are likewise beginning to figure out new ways for attracting more visitors than they had the summer before, to their greater profit and gloritication.

Charles J. Finger, a writer of some prominence, and something of a tourist himself, does not approve of the way "boosters" in some of the towns he has visited advertise their attractions.

"In nine cases out of ten," he points out, "the townspeople will tell you about the factories and the banks and the churches and the good water, and the schools in their communities. Now to do that is every bit as silly as if a business house should advertise that it had safes and cash registers and typewriters and ledgers. Such things are necessities and rightly taken for granted that every community has them.

"But what the towns might do is see that no local high board advertisements disfigure the landscape. They should search out their beauty spots and clear ways to them. They should look to the beautification of their town, so that travellers might wish to stay there, as the city of Leamington, in England, has beautified its streets and made them gay with flowers and potted plants.

"To put matters in a nutshell, the active-minded people who would do the right thing by their own town should give some consideration to the tourist's point of view. But that they never do.

"Nobody, nor you, who read, were ever, or are ever, likely to visit a town because it has an overall factory in full blast, or because there is a coal dealer and a paint and oil paper merchant in it, no matter how much of a citizen of credit and renown he might be."

This is something for civic boosters to ponder over. If this advice were followed, it would make automobile touring infinitely more enjoyable.

Has Become Educational

Postage Stamp Collecting Yields Fund Of International Knowledge

The artistic development of the postage stamp as a means of recording contemporary history and other matters typical of the national life of countries has made stamp-collecting a more interesting and adult pursuit than it used to be. A person with the philatelic hobby picks up a good deal of international knowledge almost in spite of himself. One of the most interesting stamps that has come to our notice is a very large and fine 50-cent small stamp issued by the Newfoundland government. It presents a map of the North Atlantic, with the routes of "Historic Trans-Atlantic Flights" charted upon it. A glance at this stamp will cause many to revise their conceptions, for some of them are west-to-east flights, prior to Lindbergh's famous exploit. Most important of these was Sir John Alcock's from St. John's, N.F., to Ireland in 1919, and the other adventures charted are Hawker's uncompleted flight in 1919; the U.S. Navy flight from Trepassey to the Azores in 1919; De Pinedo's flight over the same route in 1927; Lindbergh's flight from New York to Paris in 1927; Koehl's flight from Ireland to Greenly Island in 1928, and Kingston-Smith's flight from Ireland to Harbor Grace in 1930. All these events were witnessed from Newfoundland soil, which is the special reason for showing them on its air-mail stamp. —Toronto Saturday Night.

English Village For Sale

Queen's Crawley, an English village made famous by Thackeray in his "Vanity Fair," is for sale. On May 5 this tiny place, which has remained unchanged since the reign of George I, goes under the hammer. It is expected that wealthy Londoners will buy it for later subdivision. Queen's Crawley is within motoring distance over the week-end from London.

Divides Honors With Chicago

One of the worst and wickedest cities in the world is Irkutsk, in Siberia. With a population of 120,-000, as many as 500 murders are committed there every year. Arrests average only one in 50 murders and only one-half the arrests are followed by convictions.

"I had to discharge my nurse for being cruel."

"What did she do?"

"She kicked poor Fido for biting the baby."

Historic Albert Hall

Was Built By Soldier and Is Full Of Surprises

The Albert Hall, or rather the Royal Albert Hall, for it has earned that prefix of distinction, kept its diamond jubilee on March 29.

To commemorate those sixty years, perhaps someone will place a tablet over the entrance. Matter for the inscription would not be lacking. "This hall was opened by Queen Victoria. Wagner, Verdi, and Gounod conducted here; Patti sang here and Paderewski played—that would be striking enough, but how many more illustrious names could be added.

Few people know that this great pile was built by a soldier, but so it was. The architect was a sapper, Colonel Scott, who had to bring some modicum of R.E. capacity for traversing streams to his task. In fact a stream was found flowing across the chosen site of the hall, and there it flows to this day, safely restrained but never to be quenched.

It will probably surprise dancers at the annual balls to learn that this stream runs below the arena and only two feet from the bed of the hall. Raise a trap-door and there it is, hasting along at the rate of nine gallons a minute to the Thames. It is not used for any purpose, since it is very hard water.

Still more oddly, it flows across a deep well, being piped for this transit. The well also is no longer used, though it was at the beginning of the hall's career. The present secretary, Mr. Askew, tested its depth to about 140 feet.

The hall is full of surprises of this sort. It has, or claims to have the largest lift in London, which celebrates its diamond jubilee in company with the walls. Officials of the hall speak admiringly of this lift, as if it were an honoured and veteran hand.

"That's a lift for you," says one of them, "good as ever, carrying its fifteen men, never out of order. It's had a new, rope at intervals, and had its bit of greasing regularly, and it is sixty years old." This faithful lift is hydraulic.

The hall contains its own printing works, its own painters' shop, its own carpenter's shop, and has its forge somewhere in the basement with its own anvil. There are 16,-990 square feet of floor packed away in the passages in sectional piles, and the floor, which is used, of course, for the Arts Club and other balls, is put into position in 24 hours.

It is dismantled and stowed away in half that time. Another power passages mostly round the cellars.

Recognize the Danger

Railroads Keep Accidents From Explosives Down To Minimum

A paragraph giving the fact that the railroads of the United States and Canada, in 1930, carried 50,000,-000 pounds of dangerous explosives without a singe fatal accident and with a property loss of only $71 invites reflection. New York recently heard of the dangers of splinters, of the number of industrial accidents they cause, of the deaths that could be attributed to them. Yet it is not likely that by any system of appraisal the splinter could be made out to be more dangerous than nitroglycerine or dynamite. The railroad men who handled the dynamite and nitroglycerine recognized these commodities as dangerous and treated them with proper respect. They took every precaution; they followed rules! they relaxed no vigilance. The fundamental of guarding against a danger is its identification and recognition as a danger.

Increasing Wheat Production

In a definite speech at the World Grain Conference, Abraham Klesin, Soviet delegate, declared that far from reducing her wheat production, his country would increase it this year, and that instead of giving up her policy of so-called dumping, she intended to increase her wheat exports in order to pay for her imports, which now exceeded $500,000,000 a year.

Sunday school teacher—"What was King Solomon noted for, above everything else?"

Bright little girl—"He had more relatives by marriage than any other one man."

"Mummy! A bad dog's looking at me with his teeth."—Sondagsnisse-Strix, Stockholm.

Restless CHILDREN

CHILDREN will fret, often for no apparent reason. But there's always Castoria! Harmless as the recipe on the wrapper; mild and bland as it tastes. But its gentle action soothes a youngster more surely than a more powerful medicine.

That's the beauty of this special children's remedy! It may be given the tiniest infant—as often as there is need. In cases of colic, diarrhea or similar disturbance, it is invaluable. A coated tongue calls for just a few drops to ward off constipation; so does any suggestion of bad breath. Whenever children don't eat well, don't rest well, or have any little upset—this pure vegetable preparation is usually all that's needed.

CHAPTER XV.—Continued.

"I don't know what a ramsum is Mis' Maxwell, and you don't need to tell me anything about Nick. Most ways he's good as gold, but he always did like a change now and then, and when a cold-blooded vamp like Miss Halliday gets hold of him, there's no knowin' what'll happen. Why at the movies last Saturday I see a young feller with a wife and baby just led round by the nose by a woman no wickeder than her. And he set a lot o' store by his wife too. The best o' men is children in the hands of us women, you can bank on that. Of course I ain't meanin' anything personal about Mr. Maxwell."

Mary smiled. She tried to switch her off onto another subject by mentioning little Martha, but, as Gay once told Nick, no one could stop Julie when she got started. In fact, Mary's choice of subject was unfortunate, for Julie said:

"That's another thing. I suppose

Here is a Delightful Dessert!

BREAD PUDDING

2 cups St. Charles Milk
2 cups water
1 ¼ cups soft, fine bread crumbs
2 eggs, slightly beaten
½ cup sugar
1 tablespoon melted butter
¼ teaspoon salt
Grated rind of one lemon or
1 teaspoon vanilla.

Dilute the milk with water and bring to scalding point. Remove from fire. Add bread crumbs and let stand until cool. Stir in the eggs, sugar, butter, salt and flavoring. Pour into a buttered pudding dish, set in a pan of hot water, and bake in a moderate oven about forty-five minutes.

This and over a hundred other delightful recipes are to be found in the new Recipe Book we have just issued. Send us your name and address and a copy will be mailed you, free of charge.

The Borden Co. Limited

ST. CHARLES MILK

Nick was tryin' to be polite, for he said somethin' about how good Mis' Halliday was to do so much for——" Julie paused, and jerked her elbow toward the little girl who had slipped from Mary's lap and was amusing herself with a picture book. Julie lowered her voice. "Now I hope to die, Mis' Maxwell, if this ain't the truth: If Mis' Halliday had her way that child would go to the poor farm. I got ears in my head as well as eyes, and what I don't hear ain't worth hearin'; but she said to Nick, so sweet soundin' it would ha' made honey taste like vinegar: 'I look upon it as a privilege, Mr. Hastings—this chance to do something for a little child.'"

John Maxwell once said that Julie Nipps was a loss to the stage. His wife thought of it now, as her caller raised innocently-trustful eyes to an imaginary Nick. Then she straightened up and her lips tightened as she added: "And there sat Nick, takin' it all in as innocent as a baby takes its bottle which like as not the wicked nursesmaid's poisoned. Nick's awful trustin'. His uncle's the only ugly thing he ever run up against, I guess, and he don't know women. I don't remember what he answered, but she begun again and said somethin' kind o' high soundin' about the child makin' up to her for other disappointments. It sounded kind o' like a back-handed slap at Mr. Halliday.

"Disappointments! That woman never had no worse disappointment than gettin' stuck with a coat that didn't match her eyes!

"Then she begun to sing. It sounded awful pretty. I moved the curtain a mite and peeked out. Nick was sittin' there on the steps below her lookin' for all the world like he'd been handed a first class ticket to Paradise. Nick's real handsome, and he looked handsomer'n ever just then. I couldn't blame Mis' Halliday for fallin' for him. Then I thought of Gay, and I had half a mind to throw one o' them pumps at him to break the spell. But I didn't need to. Just that minute little Nick set up an awful howl. It was like things happen in the movies, Mis' Maxwell—the child rousin' the father to his stern duty. Nick rose all right. He sprinted through that hole in the hedge like he'd been fired out of a shot gun; and now I'll tell-you somethin' real interestin': Mis' Halliday looked after him for a minute, and then she sort o' shook her fist at Gay's nursery window where Nick switched a light, and what do you think she said? She said 'Damn!' or my name ain't Julia Amanda Nipps! Now what do you think o' that?"

Mary Maxwell smothered an hysterical laugh.

"Yet I was awfully ashamed," she said that evening, when relating the scene to John. "It was a mistake for me to listen to all that gossip; but you know Julie—it's like trying to dam a flood to shut her off. And besides, I was worried about Nick. All our old fears for him came back when she began her story."

"You must remember," replied John Maxwell quietly, "that in the days before the movies our friend Julie would have been a devotee of the dime novel. She craves excitement, and invents it where none exists. She can smell a scandal long before it's born; but if she took Nick to task for hob-nobbing with Mrs. Halliday, I think she'd meet her match."

He chuckled; but Mary said soberly: "Just the same, Johnny, I think Mrs. Halliday is a dangerous woman. I'm glad she's going back to Boston."

Mary Maxwell was not the only one who felt a sense of relief on the day that Angela Halliday and her numerous trunks, departed from Bakersville. Her husband, who was to stay a day or two longer in order to perfect certain plans for little Martha, was distinctly glad of her absence, a feeling that was shared in good measure by Gay, who watched the departure from her front window, and, as the car drove off, surprised her small son with an ardent hug.

"It'll seem strange not to see Mrs. Halliday fussing around the garden," said Nick that night at supper. "I wonder that anyone so fond of growing things can endure a winter in the city. I thought she looked tired when she left."

"When she left?"

"I mean at the station. I ran down to see her off. In fact, she suggested it herself. She thought Halliday wouldn't have time to go with her, and there were a lot of trunks to check. She's rather used to being waited on, you know."

Had Nick been looking at his wife he would have noticed an unfamiliar expression in her eyes.

"Of course, if one is willing to beg for help one usually gets it," she responded. "But there are some of us who'd rather check our own trunks than ask a man to leave his business to do it for us."

"But I didn't leave my business.

ANCHOR DONALDSON

I wasn't coming home this noon anyway, you know, and I had lunch later in order to take in her train. However, as far as the trunks were concerned, I needn't have gone. Halliday saw to them himself."

"While his wife was bidding you a lingering farewell? It would have taken some time to check those trunks. They filled a whole express wagon. How can one woman have such a wardrobe?"

Nick threw an amused glance across the table.

"What's the matter, old girl? Upset about anything? Your remarks sound just the least bit feline."

"Yes, I am upset," Gay confessed honestly, her color rising. "I don't think Mrs. Halliday should have asked you to see her off, nor do I think you should have gone. If she were a different woman I wouldn't care; but she's the sort people notice and speak about. Most of our friends knew you were out all night with her the time you came down with pneumonia — and you know how flakes will talk on gossip. I don't care for their gossip, but if we're to live here——"

"Why, my dear girl," Nick interrupted, "what do you mean? I never thought——"

"You don't think enough, Nick. That's the trouble. Because you love me you can't imagine that anyone could misconstrue your actions. But they do. Why even Julie——"

"Julie Nipps is a confirmed scandal monger!" Nick was angry. "I'm ashamed that my wife should listen to anything she says. I believe it's she who's responsible for your unwarranted attitude toward Mrs. Halliday. The woman feels it, too. She said last night she wished you'd let her get nearer to you."

Gay lowered her eyes.

"I'm sorry you're ashamed of me," she said coldly, and at her voice Nick's good-humor, never long absent, returned. He rose, and going around the table, sat down on the arm of her chair.

"Oh, come on. Let's not get ruffled over a thing like this. Of course I'm not ashamed of you. That was just temper. You're all I have to be proud of, Gay—you and the kiddies. If I'd known you'd mind my going to the station I wouldn't have gone, of course. Personally I don't care what people say; but if you do, I'll be more careful. Here, kiss me. I believe we almost quarrelled. It's ridiculous. Don't you know that 'there's only one girl in the world for me'?"

He sang the last words, and Gay had to smile, even though the tears were not far off. It was seldom that they came even as near as this to having words, and such things hurt her. Nick would forget, but Gay, woman-like, would feel the scars for a long time. She winked back the tears, but the eyes she lifted were very bright, and Nick understod. He put an arm about her, and said, kissing her gently: "There! that's better. Not mad, are you?"

To his surprise she didn't smile, but arose quickly, as if to clear the table.

"Not mad," she answered. "Just—just a wee bit frightened—that's all."

"Frightened? At what?"

His tone was fraught with astonishment; but Gay managing something that was an excellent imitation of a laugh, refused an answer.

(To Be Continued.)

Hospital Costs Advance

Charges Have Been Increasing Since 1913, Report States

An almost unbroken advance in hospital costs and charges between 1913 and 1929 are shown in a report issued by the Dominion Bureau of Statistics. The report is based on returns received from 198 hospitals in Canada. The rates charged in 1929 were 6.6 per cent. higher than in 1926.

A general survey of the changes which occurred in 1929 indicates that the greatest increase in rates were for public wards. Semi-private room rates moved upward very slightly, while private room rates were shown as a little lower for the first time since 1913. Operating room charges remained almost stationary. The average cost of maintenance per patient per day advanced again, and was 110.4 per cent. above the figure given for 1913. It is interesting to compare this advance with that registered by rates, which have apparently risen only by about 90 per cent. according to the movement of a weighted average for the rate figures which follow.

An average of the public ward charges made in 1929 amounted to $2.03, as compared with $1.96 in 1928. This item was $1.83 in 1926, and $1.02 in 1913, an almost uninterrupted increase having occurred since that time. Provincial average rates in 1929 ranged between $1.50 for Prince Edward Island, and $2.52 for British Columbia.

Jewish National Home

Lots Of Room For Jews In Palestine Says Lloyd George

Rt. Hon. David Lloyd George told the agency at a dinner in his honor in London, England, that there is plenty of room in Palestine for the Jewish national home without rendering homeless any of its present inhabitants.

The mandatory power of Great Britain in Palestine, he said, "must discharge its functions with fidelity and resolution."

The dinner marked the opening of a campaign for funds to establish a colony in Palestine named for Mr. Lloyd George.

Persian Balm appeals instantly to the dainty woman. Stimulating the skin, making it velvety soft in texture, it creates and preserves complexions of exquisite charm. Delicately fragrant. Cool and delightful to use. Especially recommended to soothe and dispel roughness or chaffing. Stimulating and invigorating. Imparts a youthful loveliness and protects and enhances the most delicately-textured skin. Persian Balm is the unrivalled toilet requisite.

SELECTED RECIPES

EXCELLENT BEEF STEW

2 pounds of any cheap cut of beef.
½ cup raw, diced turnip.
½ sliced onion, large.
4 tablespoons "Manola."
2 cups diced raw potatoes.
1 cup diced raw carrots.
½ cup chopped celery.
1 tablespoon "Benson's Corn Starch Flour."

Brown onions in "Manola" with meat rolled in flour and then mix with the other vegetables and cook in 3 cups, or slightly more, of cold water, not allowing the stew to do more than simmer for one or two hours. Season with salt and pepper to taste. Thicken by stirring one tablespoon of "Benson's Corn Starch" into ½ cup of cold water and adding to stew when almost done. More corn starch may be added if a thicker gravy is wanted.

The best remedy for the disease called crime is after all, arrest cure.

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any druggist for 35c.

PUTNAM'S

IMPORTANT

JUST as you deal with people you know and trust, so you should buy goods that you know from experience will give full satisfaction and long wear. Beware of cooking utensils and household articles that bear no name or one you don't know. Canada's Poultry Industry

Poultry Population Now Five Times More Than It Was Forty Years Ago

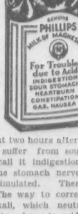
Canada's poultry industry is forging steadily ahead. The poultry population of hens and chickens for 1930 numbered 56,247,000. This represents an increase of one million birds over 1929, and is in marked contrast with the total of 12,696,701 of 1891. Present indications are that Canada's poultry population for the present year will be practically five times what it was forty years ago.

The indications of worms are restlessness, grinding of the teeth, picking of the nose, extreme peevishness, often convulsions. Under these conditions one of the best remedies that can be got is Miller's Worm Powders. They will attack the worms as soon as administered, and they pass away in the evacuations. The little sufferer will be immediately eased and a return of the attack will not be likely.

In proportion to population, more patents are issued to inventors of Switzerland throughout the world than to residents of any other nation.

"A film is to be made of a baby's first year," says a news item. It should be a scream.

Sir Isaac Newton, as a boy, worked in an apothecary's shop rolling pills.



When Food SOURS

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless liquid; pleasant, efficient and harmless. But it kills excess acids. It has remained the standard with physicians for more than 50 years.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get genuine Phillips' Milk of Magnesia prescribed by physicians for over fifty years in correcting excess acids. 50c bottles—any druggist. So look for the name Phillips on wrapper and bottle.

(Made in Canada)

Little Helps For This Week

"Fear thou not, for I am with thee; be not dismayed, for I am thy God; I will strengthen thee, yes, I will help thee."—Isaiah xli. 10.

O Love Divine, that stoop'st to share
Our sharpest pang, our bitterest tear,
On Thee we cast each earth-born care,
We fear no ill while Thou art near.

Though long the weary way we tread,
And sorrow crown each lingering year,
No path we shun, no darkness dread,
Our hearts still whispering, Thou art near.

—Oliver Wendell Holmes.

He who never connects God with his daily life knows nothing of the spiritual meanings and uses of life; nothing of the calm, strong patience with which ills may be endured; of the gentle, tender comfort which the Father's love can minister; of the blessed rest to be realized in His forgiving love, His tender Fatherhood; of the deep, peaceful sense of the Infinite One ever near, a refuge and a strength.

Douglas' Egyptian Liniment is without a rival. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning.

It's awfully difficult to find anything nice to say about spinach, except, perhaps, that there are no bones in it.

Canada Must Win World Championships

World Championships in 1932 will be won by farmers who recognize that the element and best quality seed with the most careful cultivation are essential to the production of exhibition grain. While it is recognized that these things should apply to the whole crop area, concentration upon a small plot is the best plan for securing an exhibit worthy. If such a plot is subjected to extra preparation—with more care probably than it is possible to devote to the whole crop area—and sown to the very choicest seed, it will not only provide good quality foundation stock for next spring's seeding, but a winning sample for exhibition at

The World's Grain Exhibition and Conference

REGINA, JULY 25 to AUG. 6, 1932

This great World Exhibition and Conference is organized for the benefit of Canadian farmers, for the advancement of Canadian agriculture, to demonstrate the superiority of Canadian grain and to establish once more a world-wide demand for Canadian crop products—Canada against all competitors . . . and win the large awards.

$200,000 in Cash Prizes

$4,500 a first prize for 50 lbs. of wheat; 25 lbs. of oats;
